

INTRUDER ALARMS

www.deltafsp.com

Delta Intruder alarms are designed for the very specific environment that they are protecting. Systems are designed to meet current European Standards EN52031:1 and comply with local Police Authority policies for remote signaling or audible only systems.

Detectors are designed to work to optimum conditions allowing the highest performance for intruder coverage, but also provide a high level of anti-false protection.

Our in-house team of experienced security professionals can review your requirements to develop the most effective systems.
